DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-7, 9-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petty, US. Pat. No. 5,784,633 in view of Petty US. Pat. No. 6,389,486 (hereinafter Petty '486).
- 3. Claims 1, 7, 9-11, 19, 23, 26, 28, 31 and 34, Petty teaches a multi-function interface for interfacing a modem with a host [title, abstract], the multi-function interface including a plurality of logical devices [connectors 42 of Fig. 4, col. 8, lines 49-52] associated with the modem such that the plurality of logical devices provide connectivity between the modem and the host, wherein the plurality of logical devices includes a first logical device for providing both IP-based and non-IP-based communication capabilities between the modem and the host [abstract, col. 4, lin19 thru col. 5, line 3] and the plurality of logical devices includes a second logical device [abstract, status path of Fig. 4] to provide real time status information of the modem to the host during operations [abstract].

Petty fails to teach a wireless modem.

Petty '486 teaches a method for transferring wireless modem status information to a host device [title, abstract].

Application/Control Number: 09/764,164

Art Unit: 2116

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Petty to include a wireless modem, because it eliminates the need for cables

- 4. Claims 2-3 and 14-18, 22, Petty teaches the first logical device is a communication port and the second logical device is a status port [Fig.4].
- 5. Claim 4, Petty teaches the status port provides the real-time status information as the communication device is on-line [abstract].
- 6. Claims 5 and 27, Petty teaches wireless modem is a PCMCIA card [Fig. 4].
- 7. Claims 6, 20-21, 32 and 33, Petty fails to teach using FPGA. However, FPGA are well known in the art.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teaching of Petty to include FPGA, because FPGAs having advantages including quick design and modification turn-around and reconfigurability.

8. Claims 12-13, 24-25, 29-30, 38-42, Petty fails to teach the status information includes signal strength, the temperature, connection status, operational condition of the communication device.

However, these features are well known in the art as admitted by Applicant [see the specification of the instant application, pages 2-3].

9. Claims 35-37, Petty teaches the status information is provided to the host while communicating with the NIC, while the NIC receiving data from a remote device or while there

Application/Control Number: 09/764,164

Art Unit: 2116

is no network connection between the NIC arid the remote device [abstract, col. 4, lin19 thru

col. 5, line 3].

Response to Arguments

10. Applicant's arguments with respect to claims *I-7*, 9-42 have been considered but are moot

in view of the new grounds) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to A Elamin whose telephone number is (703)305-3804. The

examiner can normally be reached on MON-FRI 9:30 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Lynne Browne can be reached on (703) 308-1159. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
